

Remarks:

This amendment is submitted in an earnest effort to advance this case to issue without delay. The examiner has indicated that the case contains allowable subject matter.

The specification has been reamended to eliminate reference to "superatmospheric" pressure. This obviates the new-matter rejection. The hereto attached second marked version and second clean version replace any previous marked and clean versions and incorporate all the amendments made to date, save those relating to "superatmospheric" pressure. No new matter whatsoever has been added.

The reference to superatmospheric pressure has been removed from the two allowable independent claims 10 and 26. All other independent claims have been canceled, and the dependent claims have been amended to depend from allowable claims 10 and 26.

Thus all the claims in the case are in condition for allowance and the case can pass to issue.

If only minor problems that could be corrected by means of a telephone conference stand in the way of allowance of this

case, the examiner is invited to call the undersigned to make the necessary corrections.
